

COMET 2000 GLASS CRUSHER AUTOMATIC CHUTE FEED

COMET Glass Crushers

allow you to safely dispose of drinks bottles, glasses, and other glass receptacles.

They are compatible with a standard 120-360 ltr wheeled bin, ideal for easy disposal or recycling.

Crushed glass is now used in many products such as road surfacing, concrete and ceramics manufacture, filter and shot blasting material, as well as its traditional use, being recycled to make new bottles or glassware.

- **For Drinks bottles, glasses and other glass receptacles**
- **Reduces bottles to crushed glass in seconds**
- **Ideal for Pubs, clubs, restaurants, hotels, exhibition centres**
- **Can be converted to "automatic" with chute feed**
- **Multiple bins can be used if colour segregation is needed**
- **Safe and simple to operate.**
- **Throughput of up to 1.45 tonnes per hour**
- **Fitted with standard 13 amp plug**
- **Saves space and organises your waste bottle disposal**

No Effort.....

Assisted gas strut allows bins to be connected and removed with ease

Safety First

Key interlock ensures that the machine cannot be operated without a bin in position
